

MPC

MICHIGAN PAIN CONSULTANTS, PC

4. Over the last 8 years, MPC has used a patient reported outcomes tool called PRISM™. As part of PRISM™, each patient at MPC completes a Pain Health Assessment (PHA) at regular intervals, which is then organized to provide a picture of how pain is impacting the patient's life. This better understanding of the patient provides guidance for clinical decision making. By addressing each patient's unique pain situation via data, we see how our treatments are positively impacting the patient's life. Aggregating the data is allowing us to advocate on behalf of our patients with insurance companies. At the same time we are advancing pain medicine and beginning to define best practices for chronic pain management. For more information on PRISM™ please reference our PRISM™ informational card or speak to your provider.

5. How MPC manages opioid medications safely and effectively:

- Please contact us directly with any questions pertaining to high doses of medications.
- MPC is happy to provide annual review/recommendations related to medication management if your provider prefers to be the prescribing provider.
- MPC uses the following to help ensure patient safety: Opioid agreements, urine drug screens, and MAPS (Michigan Automated Prescription System).

6. Collaboration with referring providers:

- MPC physicians will provide detailed notes and consultations to your referring provider to create thorough communication for exceptional care coordination.
- For specific questions or concerns regarding patient care, please contact our office directly.

Your expectations related to opioid management is critical to your overall treatment success. We appreciate your willingness to learn more about patient care at MPC.

MPC

MICHIGAN PAIN CONSULTANTS, PC

MPC's OPIOID INFORMATION EXPERTS IN PAIN MANAGEMENT

Thank you for considering Michigan Pain Consultants for the treatment of your chronic pain condition. At Michigan Pain Consultants we specialize in treating and managing chronic pain.

To better serve your needs, we would like to provide the following information.

1. **It is our goal to provide the most effective pain management by using a multidisciplinary approach**

INTERVENTIONAL PAIN MANAGEMENT
INTEGRATED PHYSICAL THERAPY
INTEGRATED BEHAVIORAL MEDICINE
CARE MANAGEMENT
PATIENT REPORTED OUTCOMES (PRISM)
REGENERATIVE MEDICINE

2. **What you should anticipate at your first visit to MPC:**

- The MPC provider will spend time getting to know you. Included in this process is data collection, assessment of risk factors, and development of a comprehensive treatment plan for you.
- MPC does not prescribe opioid pain medication
 - At the first clinic visit
 - If the patient has a history of drug abuse or other high risk behavior.
- Opioid management will only be taken over after review by an MPC physician, and at the specific request of the referring provider. This may also require the patient to complete a narcotic evaluation by a pain psychologist.

3. **MPC's main goal is to treat you as a whole and your specific pain condition(s). MPC providers look at each patient as an individual and treat that patient using modalities that will give them the most relief.**

- Let Michigan Pain Consultants begin treating your pain condition before it exceeds 60 days
