## MPC Medical Records

Please fax or mail all consults, labs, diagnostic results  
to our medical records department.

Fax: 616.242.2517

MPC: Attn Medical Records

61 Commerce Ave SW

Grand Rapids, MI 49503

Today, a rapidly growing number of pain patients who have not responded to conventional therapies are reporting life changing results after undergoing a series of low dose infusion treatments. Research over the course of the last 15 years has shown that small doses of intravenous infusions have been effective in decreasing symptoms related to depression, mood disorders and chronic pain syndromes.

Many chronic pain syndromes and mood disorders like depression are caused by a spike of activity in NMDA receptors. In cases of acute pain after an injury that heals properly, the NMDA receptor activity subsides and the pain signal is eventually turned off. With chronic conditions like depression and long lasting pain, the NMDA receptors do not turn off. In fact, they begin to multiply creating an amplified pain signal. Infusion therapy blocks the NMDA receptors and can prevent the adverse signal from reaching the brain. This allows the nerve receptors the chance to reset or “reboot” themselves.

### What does infusion therapy treat?

Michigan Pain Consultants offers infusion therapy for chronic pain and mood disorders like depression. Some of the disorders we treat are:

- Depression
- PTSD and other mood disorders
- Complex Regional Pain Syndrome (CRPS/RSD)
- Fibromyalgia
- Trigeminal Neuralgia
- Headaches
- Low back and neck pain

### Who will benefit from infusion therapy?

Infusion therapy is for anyone with depression or chronic pain that is not well controlled with traditional treatment options.

- Individuals suffering from depression, PTSD and other mood disorders.
- Individuals with neuropathic pain that is not well controlled with injections, nerve blocks, or prescription pain medication.
- Individuals with chronic back and neck pain no longer responsive to any form of treatment.
- Individuals with other debilitating musculoskeletal and joint pain.
