

Michigan Pain Consultants consolidate NOCH, Hackley practices

August 28, 2003

Fruitport Township – A pain management practice recently merged its offices at North Ottawa Community Hospital in Grand Haven and Hackley Hospital in Muskegon into a single central location.

Michigan Pain Consultants PC, one of the nation's leading multidisciplinary pain management practices, opened a new center next to the Lakes Mall in Fruitport Township in late July.

Located at 1675 E. Mount Garfield, the new center's hours of service are initially set for Monday-Friday, from 9 a.m. to 5 p.m.

"This facility is the culmination of our thriving Lakeshore practice," said Dr. Mark Gostine, co-founder of MPC. "As our population continues to age, we're seeing an increasing demand for highly specialized pain management services. This program is designed to satisfy that demand with some of the best pain management physicians and resources in the country today."

The new center will be staffed by a number of MPC's board-certified pain specialists, as well as psychologists, physical therapists and physician assistants. Its doctors use treatments such as therapeutic nerve-block techniques, medication management, physical rehabilitation, pain psychology and behavioral therapy.

Michigan Pain Consultants was founded in Grand Rapids in 1984, and has since become one of the nation's leading full-service pain management practices specializing in the diagnosis, treatment and relief of chronic and acute pain syndromes.
