

Sakari Perttula PT MOMT

New Patient Referral & Billing

800-281-3237

Sakari Perttula PT, MOMT received his education from Oulu Polytechnic School of Health Care and Social Services in Oulu, Finland. He is a registered and licensed Physical Therapist, and he earned his Masters Degree in Manual Therapy. Sakari has extensive background and experience in treating, teaching, and lecturing other PT's on chronic pain. Sakari has been practicing PT for over 25 years, starting in Finland, one year in Bulgaria, and the rest here in the US.

He has been educating himself in manual therapy, and has been working on chronic pain management teams for the last 17 years. Sakari's responsibilities as Rehabilitation Director include: direct patient care, supervision, teaching, setting up new clinics, managing & consulting, and problem solving at clinics utilizing the Synergy Physical Therapy Group services. Sakari is also teaching and lecturing at Grand Valley State University for the Physical Therapy program

Patients of Michigan Pain Consultants & Synergy Physical Therapy Group can expect skilled and knowledgeable therapists that understand the differences between an acute pain and a chronic pain conditions and how to manage those differences.

Working with the physical therapist (PT) the patient learns the tools needed to reduce their pain. This can be done by; increasing flexibility, regaining lost strength, correcting imbalances in the body and often learning how to relax. Relaxation helps reduce tension throughout the body that is causing discomfort. These tools in addition to hands on treatment with the PT and treatment received with the pain management physician will help patients reduce how often and how intensely they feel pain associated with their chronic pain condition.

Our group uses extensive and continual assessment to best track how the patient is improving in daily function and success of reduced pain since beginning a physical therapy program. Patient feedback is invaluable in this process, in order for the PT to effectively create a program the patient must be engaged in the process and they must work as a team to reach the patients goals.

Our goal at Synergy Physical Therapy is to help relieve the patients' pain and discomfort, to decrease impairment and dysfunction, improve or maintain function, prevent or minimize disability and educate our patients to be effective in self management.

Some common ailments PT can treat:
